architectural building products

KAVI Steel balustrades and Stairrail System offers a modern appearance with clean lines which suit all types of internal and external applications including:

- Balconies
- Decks
- Staircases
- Mezzanine Floors
- Ramps

These are modern, stylish and will add value to any domestic or commercial application.

KAVI is a stainless steel components manufacture firm that specializes in Balustrades & Handrail systems. We provide non-welded assemblies using machined parts and other collateral materials that are interchangeable within the railing systems.

All these products are made from

AISI 304-18/8 grade Stainless Steel backed with a team of Professional to produce an excellent product. The products are so versatile and aesthetically attractive that they're used nearly everywhere domestic, commercial and institutional buildings. Their use is limited only by the imagination.

STAINLESS STEEL STAIR RAILL & BALUSTRADE SYSTEMS
